

Expanding the Success of NYC DOT
Hunts Point Clean Trucks Program

Fleet Advisor Service

Free Commercial Truck Fleet Electrification Assistance

Considering battery-electric vehicles (BEVs) for your commercial truck fleet?

The NYC Clean Trucks Program offers a complimentary Fleet Advisor Service that provides a no-cost, no-commitment evaluation of whether BEVs and charging infrastructure are a good fit for your operations.

No-Cost Fleet Evaluation

Receive a customized assessment that helps you determine if BEVs and charging solutions align with your commercial truck fleet's daily needs. Explore available vehicle and charger options with absolutely no obligation to purchase.

Expert, Fleet-Focused Guidance

Our team walks you through best practices for BEV adoption—covering vehicle selection, electric utility coordination, cost considerations, operational planning, and the overall benefits of electrification.

Funding Insights + a Personalized Roadmap

Your tailored electrification plan will include:

- Vehicle recommendations tailored to your commercial truck fleet profile
- Cost projections and total cost of ownership (TCO) analysis
- On-site electrical capacity evaluation, including potential upgrade needs
- Available funding and incentives for BEVs and charging infrastructure
- BEV fundamentals explained in clear, easy-to-understand language

Benefits for Your Business

- ✓ Lower fuel and maintenance costs
- ✓ Stay ahead of future regulations for commercial truck fleets
- ✓ Reduce emissions and support cleaner air
- ✓ Learn how to take advantage of funding opportunities

Get Started

Contact our **NYC Clean Trucks Program Team** to schedule a brief virtual pre-participation call (15 – 30 minutes). We'll explain how simple the process is and begin your fleet's electrification assessment.
